

SUBARU

# FORESTER

# STAND OUT IN THE MIDDLE OF NOWHERE

With looks to thrill, the Forester SUV is designed to turn heads in the city, while navigating the rugged demands of our wild backcountry.

Not only does it look good, but it feels good with the power of our 2.5L Boxer engine combined with Subaru's legendary All-Wheel Drive and enhanced X-Mode—giving you the freedom to go anywhere. And, if you ever need a second pair of eyes, the Forester is equipped with EyeSight® clever crash avoidance technology for confidence in all conditions.\*

It won't be long before you find that New Zealand's backyard just got bigger.

\*On the very rare occasion that you wish to take your Subaru for a swim, we strongly advise against deep sea driving. While our All-Wheel Drive and EyeSight clever crash avoidance technology has been rigorously tested, it has not been designed to navigate apocalyptic wastelands, drive through alternative dimensions, or over slip 'n' slides.

# WHAT MAKES IT A SUBARU

On New Zealand roads we expect the unexpected. Whether that's unexpected road surfaces, conditions, or the odd wayward sheep, every Subaru comes fully-equipped to handle it.

SCAN TO DISCOVER WHAT'S UNIQUE ABOUT SUBARU

## SYMMETRICAL ALL-WHEEL DRIVE

Given the roads Kiwi drivers have to contend with, our Symmetrical All-Wheel Drive system is an indispensable feature for getting around in NZ.

The way it works is simple – as soon as your Subaru senses a loss of traction in any of the four wheels, it instantly transfers that power to the other wheels that still have grip, giving them the extra oomph to get you out of trouble. It happens so seamlessly you probably won't even notice it, you'll just feel that famous Subaru handling.

### Delivering confidence & control

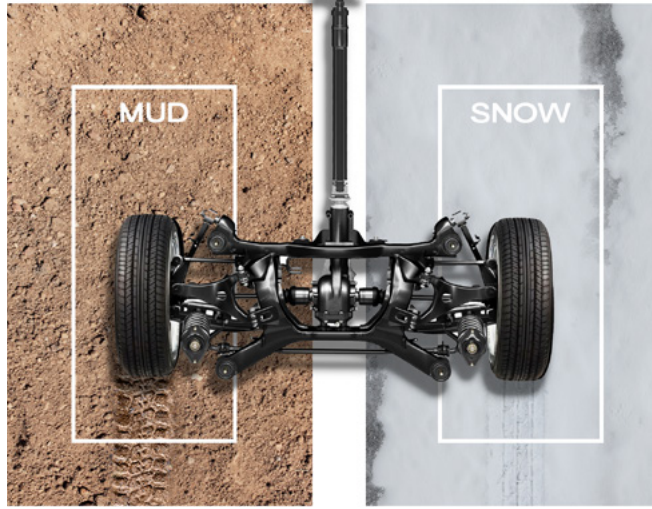

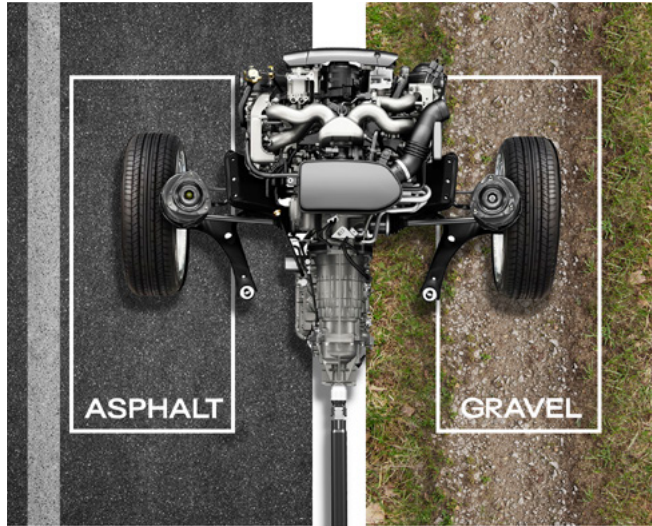

Most cars only distribute power to two wheels, while Subaru's All-Wheel Drive system delivers targeted power to all four wheels simultaneously, giving you twice the grip capacity.

### Standard on all NZ new Subarus

We believe in All-Wheel Drive so much that it comes standard in every new Subaru sold through our Authorised Subaru Centres. The way we see it, with NZ's diverse conditions, anything less is sub-standard.

### Engineered for perfect balance

Since 1973 our engineers have been perfecting a platform that is symmetrical, creating an innate sense of balance, with a lower centre of gravity, for greater stability around corners and a smoother power delivery.

## EYESIGHT® TECHNOLOGY

EyeSight® is Subaru's award-winning system of cameras and clever computing that acts as your second pair of eyes. It provides a host of safety and driver convenience features. And comes standard in all automatic Subarus.

It uses three-dimensional images captured by cameras mounted at the top of the windscreen to monitor the road, and other road users ahead of you. It can do everything from recognising and preventing potentially dangerous situations to making heavy traffic a bit less tedious.

### EyeSight Features:

- Pre-collision brake, brake assist and throttle management
- Adaptive cruise control
- Lead vehicle start alert
- Lane sway and lane departure warning
- Lane keep assist
- Autonomous emergency steering
- Lane centering function

## BOXER ENGINE

Every Subaru has another hidden advantage over ordinary cars: its distinctive 'flat' Boxer engine. Horizontally opposed pistons are balanced with the punching action of two boxers, hence the name, and allow for a lower profile engine. When combined with the AWD platform, every Subaru handles like a dream. And the Boxer engine benefits the driver in other ways too.

### Lower centre of gravity. More control.

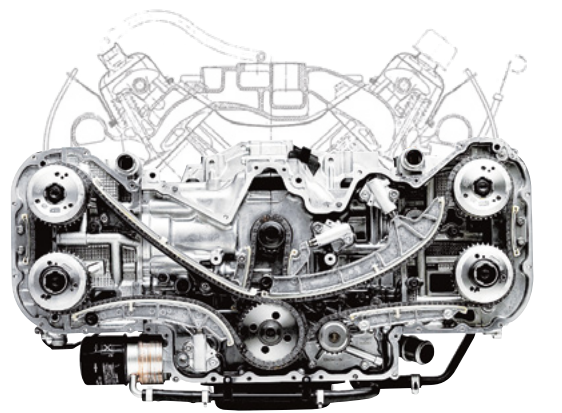

Designed to sit horizontally in the engine bay, the iconic Boxer gives you a low centre of gravity for better handling, balance, and a smoother drive.

### More power. Less vibration.

The evenly balanced forces of the engine produce more torque with less vibration. And with less vibration, comes less noise, and greater cabin comfort.

### Flatter engine layout. Higher level of safety.

Perhaps most importantly of all, if a severe frontal collision occurs, due to its low position, the engine will slide below the cabin – not into it.

## X-MODE

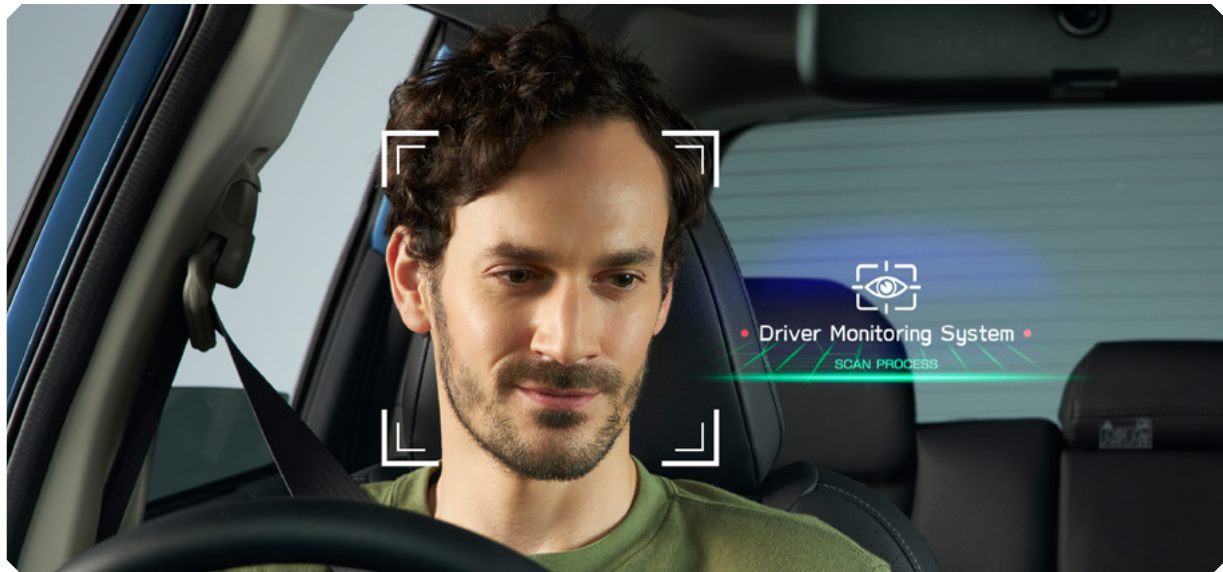

Activate this and your Forester knows you mean business. It increases driving performance by reducing potential wheel spin on super slippery surfaces, steep inclines, and extra rough roads. When navigating steep declines, X-Mode also engages hill descent control. And for models with Dual X-Mode, the deep SNOW/MUD option generates maximum grip more quickly, making it easier to move the vehicle in deep snow or mud.

## SUBARU INTELLIGENT DRIVE

SI-DRIVE regulates key engine functions which enables the driver to choose from two distinctive driving modes on selected models: **Intelligent (I)** Mode for everyday city driving and optimised fuel efficiency, or **Sport (S)** Mode for highway driving, enhanced acceleration and consistent power delivery.

## DRIVER MONITORING SYSTEM\*

The Driver Monitoring System adds further convenience and safety to every drive. Using a driver facing camera and facial recognition technology it knows who is driving and can look out for driver fatigue.

**Driver personalisation** – Your Subaru can recognise you (and four others) and adjust to your personal preferences, including: driver's seat position, preferred door mirror angle, Multi-Function Display settings, air conditioning settings, and other instrument cluster displays. (Even driver specific fuel efficiency stats for the competitive families.)

**Wandering gaze warning** – warns both passengers and the driver through a visual and audio alert if the driver continues to look away from the road ahead.

**Driver drowsiness warning** – can detect if the driver is dozing or getting drowsy and offer a warning. (Drowsiness is recognised by calculating the time ratio the driver's eyes are closed.)

**\*DMS Safety package:** includes wandering gaze and drowsiness warnings. Available on Forester X Sport, Forester Premium, Forester e-Boxer Hybrid and Forester Premium e-Boxer Hybrid. **DMS Personalisation package:** includes driver personalisation features. Available on Forester X Sport, Forester Premium and Forester Premium e-Boxer Hybrid.

## CONNECTIVITY

With an 8" touchscreen, the infotainment system comes complete with Apple CarPlay™ and Android Auto™ making device connectivity seamless. Satellite Navigation is also available on selected models.

## SUBARU LINEARTRONIC TRANSMISSION (WITH MANUAL MODE)

Unlike a conventional automatic transmission, which uses fixed gear ratios, we created the world's first longitudinally mounted continuously variable transmission system to complement our unique Symmetrical All-Wheel Drive system. Result? Greater performance and efficiency, with a smoother gear change and optimum gear ratio at every moment in time. (Or flick it to 'manual mode' and use paddles on the steering column to change through preselected gear ratios.)

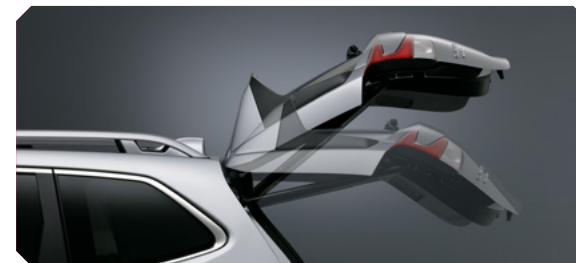

## GESTURE CONTROL

Controlling your internal cabin comfort levels just got easier, because your Forester can recognise simple hand gestures to turn the A/C temperature up or down.

## SMART KEY & REAR POWERED GATE

For ultimate convenience, every Forester comes with a Smart Key that enables Push Button Start and keyless entry. While the Premium and X Sport models also feature a Rear Powered Tailgate – ideal when your hands are full.

## 5-STAR SAFETY

For us, safety isn't optional, and it shouldn't be for you either. That's why we've engineered the Forester to achieve an ANCAP 5-star safety rating, the highest possible.

## SUBARU VISION ASSIST

With driver warnings, extra camera angles, and clever features, Subaru Vision Assist gives you extra confidence whether it's changing lanes, or parking in a tight spot. It features:

- Blind spot monitor
- Lane change assist
- Rear cross traffic alert
- Adaptive driving beam\*
- Side view monitor\*
- Front view monitor\*
- Reverse automatic braking\*

\*Some features are only available on certain models.
